**Listing of Claims:**

Claims 1-14 (canceled)

15. (Previously presented) A method of evening skin tone of the skin of a mammal, said method comprising the step of applying to the skin a topical, skin care composition comprising a soy product, wherein said product comprises a non-denatured soy product having trypsin inhibitory activity and a stabilizing system, said stabilizing system comprising a member selected from the group consisting of an antioxidant, a chelating agent, or a preservative.

16. (Previously presented) A method of treating acne in the skin of a mammal, said method comprising the step of applying to the skin a topical, skin care composition comprising a non-denatured soy product, wherein said product comprises a non-denatured soy product having trypsin inhibitory activity and a stabilizing system, said stabilizing system comprising a member selected from the group consisting of an antioxidant, a chelating agent, or a preservative.

17. (Canceled)

18. (Previously presented) A method of evening the texture of the skin of a mammal, said method comprising the step of applying to the skin a topical, skin care composition comprising a soy product, wherein said product comprises a non-denatured soy product having trypsin inhibitory activity and a stabilizing system, said stabilizing system comprising a member selected from the group consisting of an antioxidant, a chelating agent, or a preservative.

19. (Previously presented) A method of increasing the elasticity and firmness of the skin of a mammal, said method comprising the step of applying to the skin a topical, skin care composition comprising a non-denatured soy product, wherein said product comprises a

non-denatured soy product having trypsin inhibitory activity and a stabilizing system, said stabilizing system comprising a member selected from the group consisting of an antioxidant, a chelating agent, or a preservative.

20. (Previously presented) A method of reducing the shine and oiliness of the skin of a mammal, said method comprising the step of applying to the skin a topical, skin care composition comprising a soy product, wherein said product comprises a non-denatured soy product having trypsin inhibitory activity and a stabilizing system, said stabilizing system comprising a member selected from the group consisting of an antioxidant, a chelating agent, or a preservative.

21. (Previously presented) A method of treating cellulite in the skin of a mammal, said method comprising the step of applying to the skin a topical, skincare composition comprising a soy product, wherein said product comprises a non-denatured soy product having trypsin inhibitory activity and a stabilizing system, said stabilizing system comprising a member selected from the group consisting of an antioxidant, a chelating agent, or a preservative.

22. (Currently amended) A method of treating and ~~preventing~~ reducing the risk or severity of sunburn on the skin of a mammal, said method comprising the step of applying to the skin a topical, skin care composition comprising a non-denatured soy product, wherein said product comprises a non-denatured soy product having trypsin inhibitory activity and a stabilizing system, said stabilizing system comprising a member selected from the group consisting of an antioxidant, a chelating agent, or a preservative.

Claims 23-29 (canceled)

30. (Previously presented) A method of evening the texture of the skin of a mammal, said method comprising the step of applying to the skin a topical, skin care composition comprising a soy product, wherein said product comprises a non-denatured soy product

containing trypsin inhibitory activity and a stabilizing system, said stabilizing system comprising a member selected from the group consisting of an antioxidant, a chelating agent, or a preservative.

31. (Previously presented) A method of increasing the elasticity and firmness of the skin of a mammal, said method comprising the step of applying to the skin a topical, skin care composition comprising a non-denatured soy product containing trypsin inhibitory activity, wherein said product comprises a non-denatured soy product and a stabilizing system, said stabilizing system comprising a member selected from the group consisting of an antioxidant, a chelating agent, or a preservative.

32. (Previously presented) A method of reducing the shine and oiliness of the skin of a mammal, said method comprising the step of applying to the skin a topical, skin care composition comprising a soy product, wherein said product comprises a non-denatured soy product containing trypsin inhibitory activity and a stabilizing system, said stabilizing system comprising a member selected from the group consisting of an antioxidant, a chelating agent, or a preservative.

33. (Previously presented) A method of treating cellulite in the skin of a mammal, said method comprising the step of applying to the skin a topical, skincare composition comprising a soy product, wherein said product comprises a non-denatured soy product containing trypsin inhibitory activity and a stabilizing system, said stabilizing system comprising a member selected from the group consisting of an antioxidant, a chelating agent, or a preservative.

34. (Currently amended) A method of treating and ~~preventing~~ reducing the risk or severity of sunburn on the skin of a mammal, said method comprising the step of applying to the skin a topical, skin care composition comprising a non-denatured soy product, wherein said product comprises a non-denatured soy product containing trypsin inhibitory activity and a stabilizing system, said

stabilizing system comprising a member selected from the group consisting of an antioxidant, a chelating agent, or a preservative.
